

STERLING® BAND SAW BLADES

The solution to ALL your saw blade needs!

TIMBER MASTER TK™ COLLECTION

TIMBER MASTER TK™ CT Carbide Tipped

This is the ultimate cutting tool for resawing hard and abrasive wood species. The precision ground cutting surfaces provide fast, smooth cuts. As in all mill type operations, for optimum life, care must be taken to be sure the wood is free from metal contaminants, such as nails, fence wire, bullets, etc.

Width x Thickness		T.P.I.	Style	Item No.
Inches	mm			
1-1/2	41	1.7/1	TRIPLE CHIP	943133
.050	1.27			
2	54	1.7/1	TRIPLE CHIP	943172
.062	1.60			

Available in coils and welded to length.

TIMBER MASTER TK™ B M42 Bi-Metal

This is an excellent heavy duty blade for production wood cutting. A hardness of 68-69 Rc on the tooth edge provides long blade life, especially for cutting abrasive, exotic wood species.

Width x Thickness		T.P.I.	Set	Style	Item No.
Inches	mm				
1-1/4	34	1	RAKER	HOOK	925310
.042	1.07				
1-1/2	41	1	RAKER	HOOK	925320
.050	1.27				
2	54	1	RAKER	HOOK	925329
.050	1.27				
2	54	1	RAKER	HOOK	925330
.063	1.60				

Available in coils and welded to length.

****Heavy Duty**

Available in coils and welded to length.

The TIMBER MASTER TK™ Pro Cut series products are manufactured with a unique hardening process providing you with a full tooth hardness for extended wear life as well as providing a backer with excellent flex life for multiple resharpenings.

The Timber Master TK™ Pro Cut series is designed for band mill and re-saw applications. These blades are pre-sharpened at the factory for performance “right out of the box” for extended life and optimal cost effectiveness.
